S4HANAPEDIA.AI Business Engine

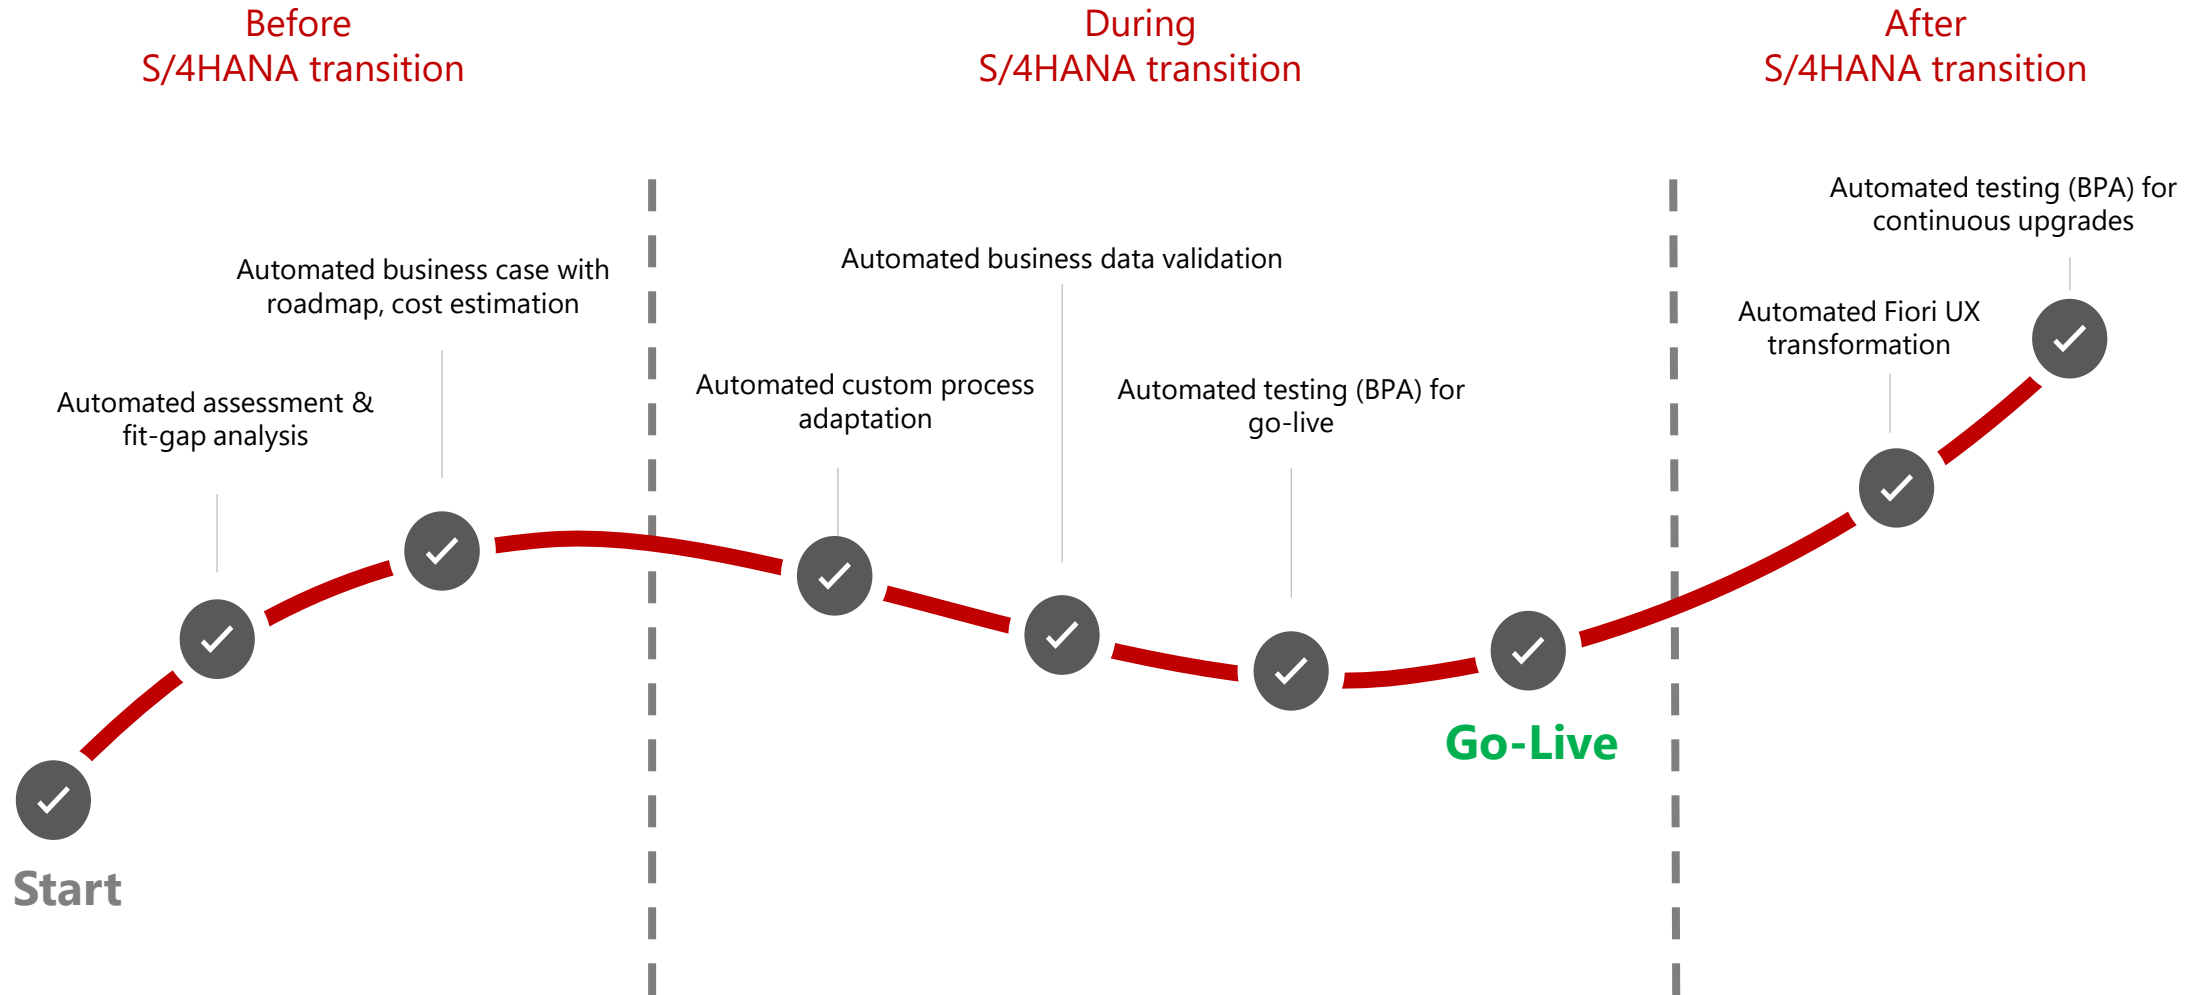

Knowledge base engine to control and govern the project execution with analytical business insights

S/4HANA Move Program

Qualified by SAP as part of global SAP S/4HANA Move Programme and approved by SAP for ISV partnership

Automation Areas

Project Governance + Collaboration + Cutover Orchestration + Training + Event Management + Issue Management

Test catalogue

Single source of truth for test operations in the complete S/4HANA lifecycle including FPS/SPS upgrades

ID	Name	Description	Outcome	Priority	Module	Testing Type	Actions
> TSFTP-001	FICO-Accounts Payable			Medium	Real Estate Management Controlling (CO)	Unit testing Integration testing User acceptance test Smoke testing Security testing Interface testing	
▼ TSFTP-001	Funds Management (FM)			Medium			
> TSFIS-001	Release Budget Data (Mass)			Medium			

Test case import

Inbuilt platform to load your test cases from Excel, Solution Manager of ECC or S/4HANA landscape

1 Download Excel Template 2 Upload Excel 3 Auto Create

Download the Excel Template to auto import your testcases

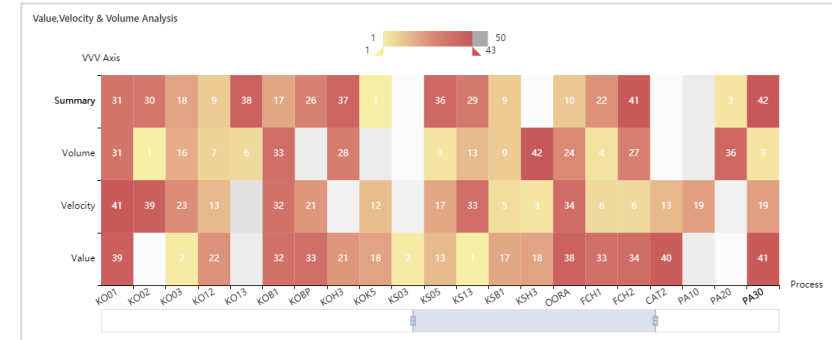

Load Test Cases in the downloaded templated and proceed further

Next

Test case auto-recommendations

S/4HANA upgrades and business specific aligned value, volume, velocity & impact based testing recommendations

Test centre

Stakeholders, timeline, TR tracking, meetings, document management & collaboration

Overview [Edit Test Case](#)

Test Plan: Order to Cash (OTC) Test Scenario: Pre sales Activities - Contracts - Test Case #001

Module: Finance Business Process: Order to Cash (OTC)

Description: Automatic Lockbox Reprocessing is optional because it requires you have implemented SAP Cash Applications, which requires a separate, additional license. When implemented, automatic reprocessing is applied to certain business scenarios. Currently, Automatic Lockbox Reprocessing can only be used for Unprocessed or Posted on acct business scenarios. Restriction Processing for the Part-applied business scenario is currently not available. In this activity, you schedule the background job processing. Unprocessed Lockbox statements can be matched to invoices, automatically, to clear open items that didn't get cleared during the previous Upload Lockbox Files procedure.
